The Architecture of Metal Fabrics

GKD Metal Fabrics are technologically advanced woven metal fabrics suitable to large or small scale applications, both interior and exterior. We provide a complete design-build solution, custom engineering and installing each project with proprietary attachments. Our metal fabrics are manufactured on four continents, adding drama and beauty to great architecture throughout the world.

A Design-Build Solution

A Turnkey Product

When you specify GKD metal fabrics, we will work with you on concept development, design, engineering, fabrication, delivery and on-site installation, including the hardware for attachment. Our team of professionals is accustomed to working worldwide with the most demanding designs and programs, collaborating with your team to realize your vision — without compromise.

For the Long Haul

GKD metal fabrics are the smart choice — environmentally friendly, durable and virtually maintenance-free. Our stainless steel is an energy efficient product to manufacture, made with recycled material as well as being recyclable itself. Non-corrosive, GKD metal fabrics can be simply washed with water if it ever becomes necessary.

Façades

Woven metal façades provide both utility and beauty for any structure, from a parking lot to a museum. Around the world, residences, offices, factories, hospitals, schools and sports facilities are protected and enriched by GKD metal fabrics. The open weaves offer transparency and functionality, enticing from the outside without obscuring views from within, allowing for air circulation while also providing the necessary security.

Interior Surfaces

Metal fabrics are an ideal material to clad interior surfaces — walls, columns, ceilings or partitions. They can be tiled or framed for flat surfaces but their flexibility allows for alternative uses. Metal fabrics can be wrapped around columns or draped, suspended from ceilings. In any application, metal fabrics add glamor and allure.

Mediamesh

Mediamesh incorporates graphics into metal fabrics with LEDs for a controllable, illuminated solution, displaying digital imagery, logos, advertising, film and video through a web-based interface.

Etched Surfaces

Etching brings logos or other images to life by producing a matte surface that contrasts with the polished surrounding area, providing artwork that is unlimited in scale.

Solar Management

GKD metal fabric sun screens can help achieve significant energy savings by minimizing heat gain during warm months, while their environmental benefits also support LEED opportunities.

Safety and Security

GKD metal fabrics are an ideal solution for safety and security concerns. For railing or balustrade infill they provide security while retaining a light and graceful presence. The material flexibility also facilitates its use on more complex, organic designs.
