

# AMS Pro Lock

The AMS Pro Lock is the ultimate standing seam panel choice for any project using specialty metals. Whether you are using Terne Coated Stainless, Aluminum, Copper or a variety of exotic metals it is the perfect panel. This panel offers both superior structural panel performance while maintaining architectural aesthetics. AMS Pro Lock is ideal for your commercial, industrial, institutional and residential needs.

UL-90 Rated

## MATERIALS

- Galvanized
- Zincolume Plus
- Aluminum
- Stainless Steel
- Terne Coated Steel
- Cold Rolled Steel
- Copper
- Rheinzink

## MATERIALS FORMED

- Galvanized 30 Ga.-22 Ga.
- Zincolume 30 Ga.-22 Ga.
- Aluminum .019 - .040
- Copper 16oz. - 20oz.

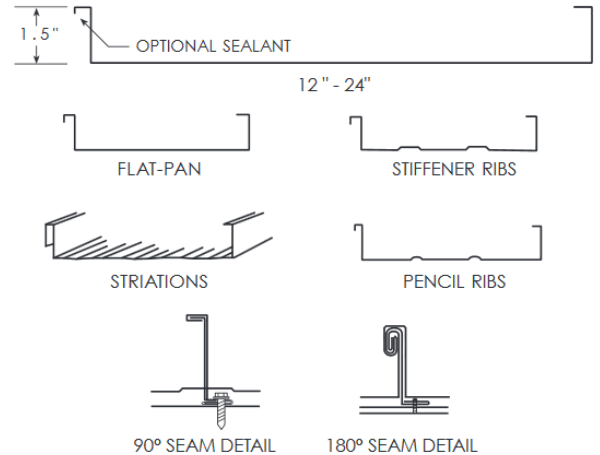

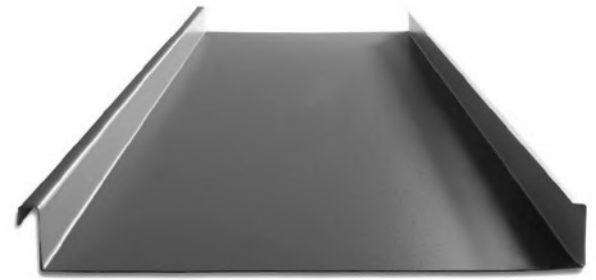

## TESTING

- UL-790 Class A Fire Rated
- ASTM G-23 Type EH Accelerated Weathering
- ASTM 2274 Humidity Resistance
- ASTM B 117 Salt Spray Resistance
- ASTM D 1808 Chemical/Acid Pollution Resistance
- ASTM D 3363 Hardness
- ASTM D 2794 Impact Resistance

## FINISHES

- 53 Kynar Painted Colors
- 33 SMP Colors
- 25 Polyester Colors
- Custom Colors

## SMOOTH OR STUCCO EMBOSSED

The AMS Pro Lock panel offers a variety of features perfect for your architectural projects. It has a 1.5" leg height and can be produced in continuous lengths. The continuous interlocking seam allows for increased structural performance and wind/water resistance. This panel also incorporates a concealed fastener clip that removes the need for exposed fasteners and allows for thermal expansion and contraction. AMS Pro Lock can be installed over open framing, solid substrates or rigid insulation. This panel is optimal for roofing, mansard, fascia and even sidewalls. It is backed by a 20 - 40 year paint system warranty. We also offer optional weather tightness warranties in both side lap and full system up to 20 years. The recommended minimum slope is 1:12.
