THE BASIS OF DESIGN

WE'VE GOT YOU COVERED.

AMS works together with clients to clearly understand their architectural material needs. We see ourselves as one part of the entire picture.

Architects, contractors, installers and manufacturers traditionally provide design and construction services separately and at different times during a project. Often the various groups don't collaborate on issues pertaining to the client. Changes, updates and upgrades from one group often fail to make it to everyone involved.

At AMS, we work to bring a collaborative process to the different groups involved in the design and construction process. We work with each partner to establish clear and efficient collaborative practices to ultimately benefit the client.

We develop clear lines of responsibility and communication with each of the partners and the client. We work to set realistic timelines for all deliverables. We provide assessment and feedback during the design and construction phases to ensure everything moves forward efficiently and effectively.

EQUITONE
Fibre cement facade materials

EQUITONE is a through-colored high-density fiber cement facade material, resulting in the surface displaying the inner texture and color of the core material.

These unique panels have been produced to show the raw, untreated texture of the fiber cement base material. Equitone is a long-lasting material that can be transformed into any size or shape in the workshop or onsite. With Equitone, you're able to achieve flawless, intricate details.

TRESPA®

TRESPA panels set the standard for high-performance high-pressure laminate (HPL) cladding, offering unmatched durability, weather resistance, and design versatility. Engineered with Electron Beam Curing (EBC) technology, Trespa panels offer unparalleled color stability, UV resistance, and zero maintenance making Trespa ideal for architectural facades.

LUX
ARCHITECTURAL PRODUCTS

LUX ARCHITECTURAL PRODUCTS is a leading manufacturer of high-value galvalume coated steel cladding products.

LUX materials are made with durable 24-gauge steel, providing superior defense against the elements. LUX's finishes are unique, realistic and long lasting via their proprietary process. When you source LUX cladding through Architectural Metal Solutions (AMS), you can count on highly durable materials, a commitment to customer satisfaction and a streamlined building process.

CEI
MATERIALS
INVENTIVE FACADE SOLUTIONS

CEI MATERIALS offer low maintenance and long lasting visual appeal. Available in a variety of materials, colors, finishes, dimensions and textures to match your design needs, including Aluminum, Copper and VMZinc®. Cladlock is offered in flat, tapered and custom formats.

A truly innovative product, CEI Materials metal wall systems are a 100% recyclable, pressure equalized rainscreen that attaches to nearly any substrate without the use of clips or extrusions. No joint sealants, gaskets, or butyl tape are required, which eliminates maintenance challenges common with other materials.

NVELOPE
MAKING CLADDING HAPPEN

NVELOPE offers facade and rainscreen facade support systems.

Experienced innovators delivering pragmatic solutions in façade and rainscreen façade support systems, since the 1980s. NVELOPE partners with the key façade manufacturers, to provide high-quality products for the best value.

ALIVA SISTEMI PER FACCIATE

ALIVA is a superior product for exterior building projects. The ventilated facade systems are based on maximum reliability, can be fully customized and comply with strict industry regulations.

Expanded and wire mesh metal sheets make it possible to create surfaces with highly unique designs, effects with shadows and shapes, giving projects a strong visual impact.

NICHIHA fiber cement

the power of possibilities™

NICHIHA panels bring the look of wood, stone, brick, metal and more to your commercial or residential projects with high-performance fiber cement. Cement siding that complements and defines modern builds for a striking exterior design. Discover the capabilities and beauty of Nichiha.

URBAN PLANKS

SERIES BY AMS

AMS URBAN PLANKS provides architects with an exciting new design opportunity. Designing with dramatic vertical and horizontal narrow fiber cement panels is no longer a challenge.

Utilizing Equitone materials, URBAN PLANKS are offered in standard and custom widths and lengths. URBAN PLANKS in Classic and Classic Plus formats are readily available in featured finishes.

Custom designs, widths and lengths are available using AMS URBAN PLANKS.

WOODLAND PLANKS

SERIES BY AMS

AMS WOODLAND PLANKS provides architects the ability to design and create an endless combination of natural woodgrain facades with zero legacy of maintenance. General contractors and installers can approach all projects with confidence, knowing that the materials and necessary accessories are readily available locally.

Utilizing Trespa materials, WOODLAND PLANKS are offered in standard and custom widths and lengths. WOODLAND PLANKS in Classic and Classic Plus formats are readily available in featured materials.

SEMPRE

SERIES BY AMS

SEMPRE utilizes state-of-the-art architectural metal panels to formulate the most comprehensive and technically advanced system developed to meet the rigorous demands of the ventilated rainscreen market.

At the basis of SEMPRE is the profound knowledge of ventilated facade systems and their materials. Providing maximum reliability and performance under all conditions, every aspect of SEMPRE aims to supply a facade system that will look and perform…."Always and Forever."

GKD's core competency is the weaving of metals and other materials with pioneering technology in top quality, utilizing interdisciplinary thinking, creative solutions and customer-oriented service.

Offering mesh solutions for the widest range of applications, GKD is continuously investing in new weaving technologies and using state-of-the-art simulation techniques and production processes. Together with renowned research institutes, we quickly bring mesh innovations to market maturity.

CUPACLAD natural slate offers a high-quality, natural and durable façade that is guaranteed for over 100 years. Each hand-split and hand-sorted slate results in a panel unique to itself that is durable, sustainable and non-combustive. CupaClad performs at the highest level and is a beautiful option for architects and designers alike.

THERMAL FRAME SYSTEMS are in stock at AMS, with an extensive amount of extruded aluminum substructure for all wall panel applications. We offer the most popular profiles and can immediately ship anywhere in the USA. Our profiles are pre-painted black, 1" deep and 12' long for your ease of use.

Using AMS substructure will help you save on labor costs and our "ready now" delivery will eliminate long lead times. Call us today for the best pricing in the market!

AMS is an industry leader in factory-produced metal panels, maintaining extensive roll-forming equipment in all regional areas. The facilities factory-form standing seam, exposed fastener, flush wall, soffit and horizontal wall panels in lengths up to 64'. Matching flashing and trim can be factory-formed or field-formed.

The AMS perimeter/roof product lines provide the complete system to ensure protection from the elements while eliminating the need for field fabrication.
